Highly motivated Fullstack Web Developer with a strong specialization in frontend architecture and a proven track record of deploying scalable web applications. Currently spearheading a strategic digital initiative for the Serang City Government and managing the web platform for the Advocare organization, architecting robust, user-centric solutions using Next.js, React, and TypeScript. Demonstrated commitment to technical excellence through end-to-end project delivery, including the dynamic Ourtala community platform. Proficient in bridging complex backend requirements with high-performance, responsive, and pixel-perfect user interfaces. A proactive problem-solver dedicated to writing clean, maintainable code and elevating the overall digital experience.
